Splash screen & main screen

○ When the app is launched the splash screen will be displayed, followed by the main screen, where the user is able to interact with the app's features.
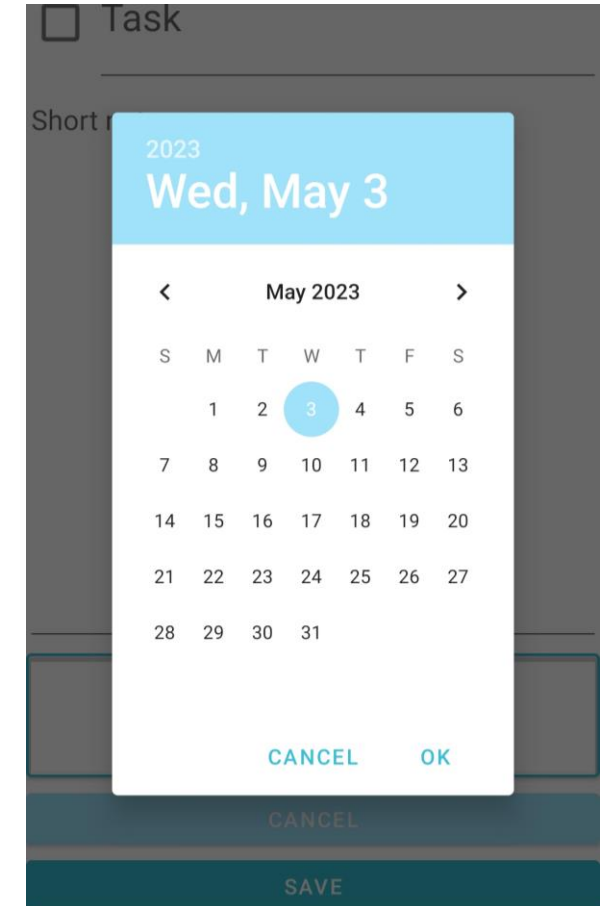

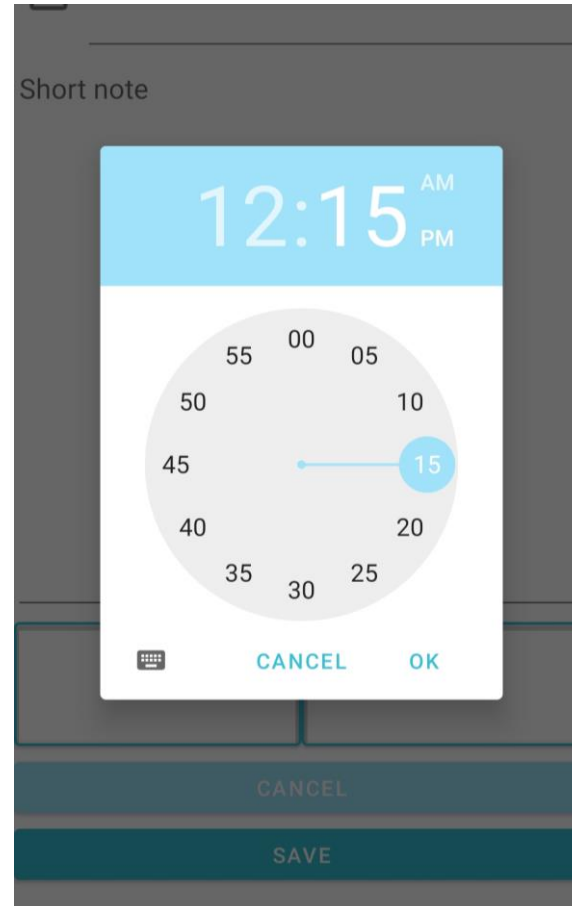

Creating a new task

○ The user can press the **+** button in the "***My tasks***" section to add a new task.

○ Users can enter a task's title, a short note, and its due date and time using the **text inputs** and **buttons** in the Task activity.

Add a new task

Mark the task as complete

Enter the task name

Enter a short note about the task

Enter a due date for the task
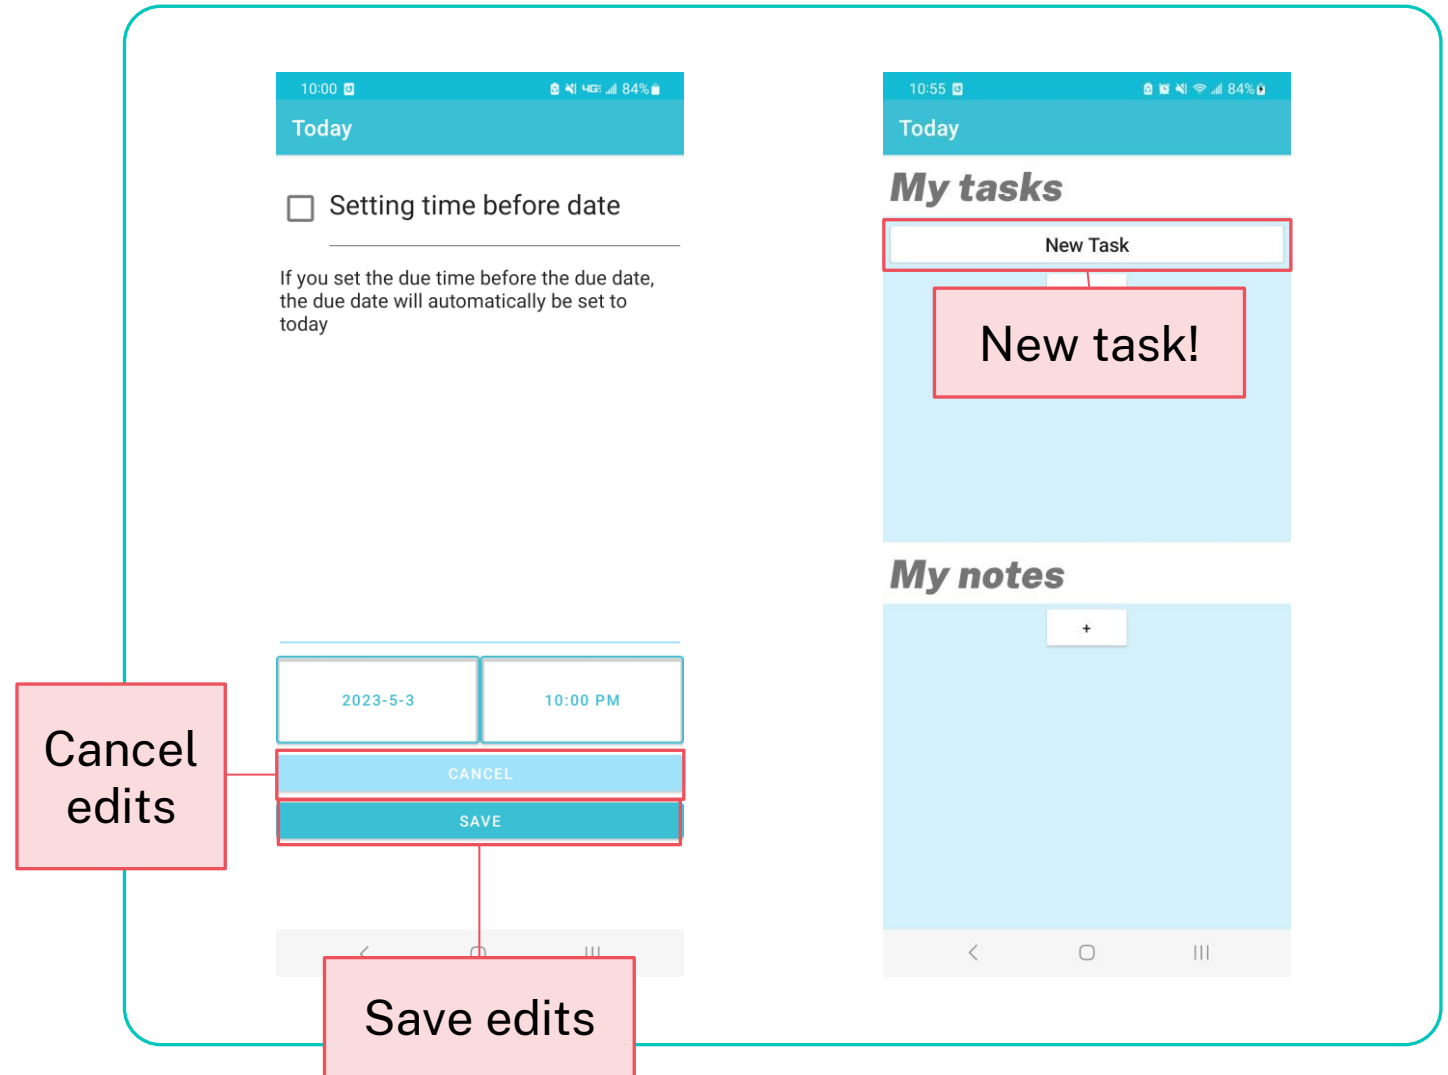

Enter a due time for the task

Adding the due date to a task

- The "**Select date**" button allows for selecting a **due date** for the given task.

  - This prompts the Android *date picker* dialog box, from which a user can select a day.

- The "**Select time**" button allows for selecting a **due time** for the given task.

  - This prompts the Android *time picker* dialog box, from which a user can select a time.

  - If the user selects a time before selecting a date, it's assumed that the task is due today.
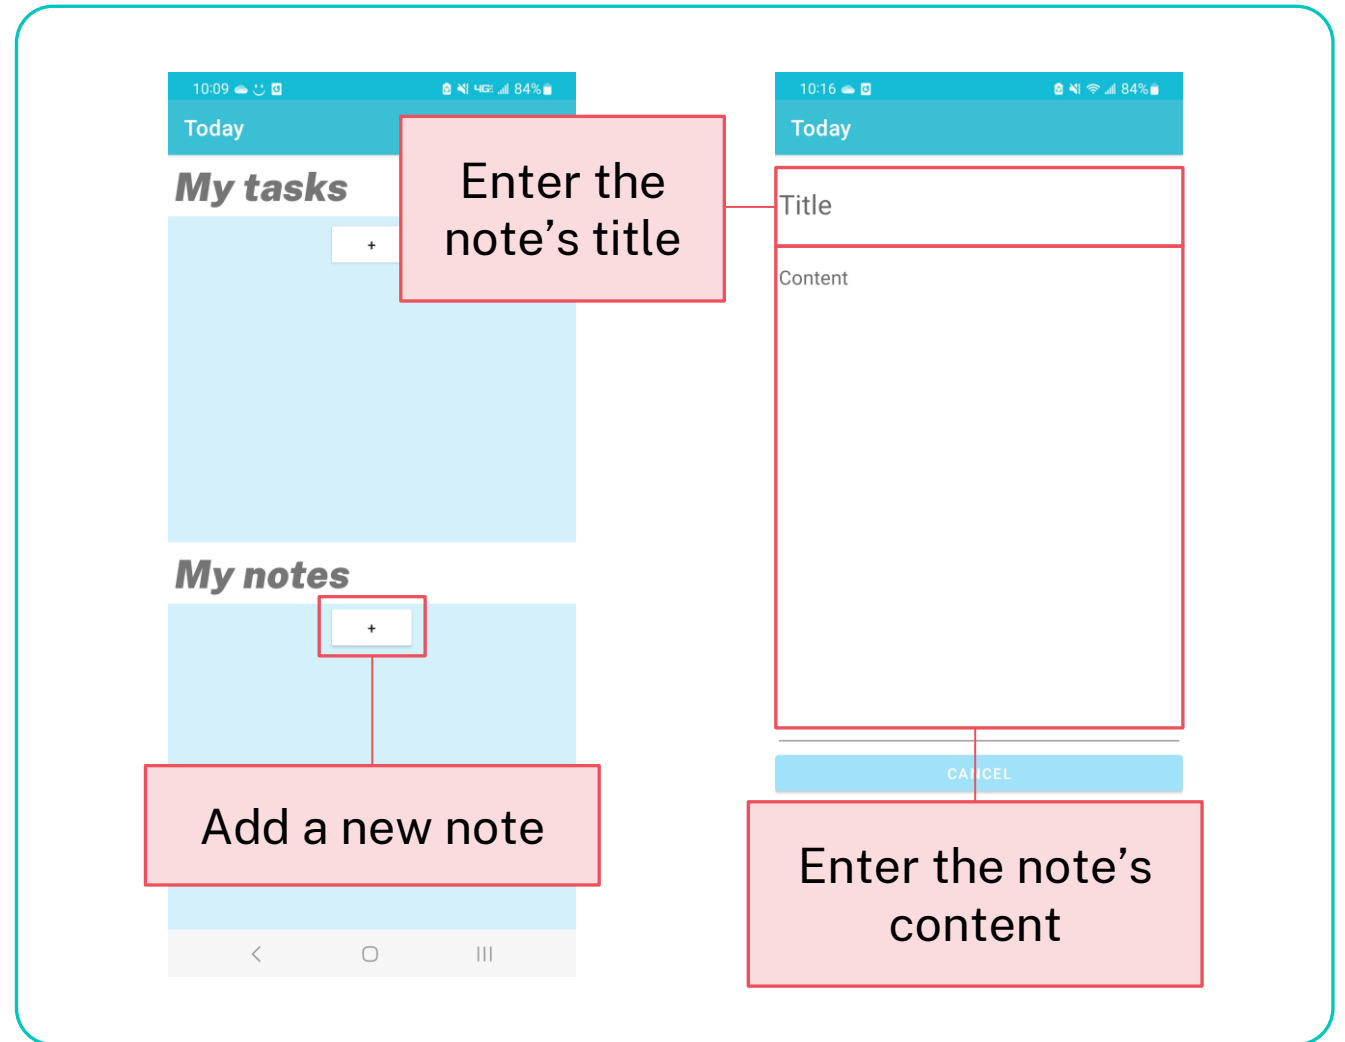

Saving or canceling edits to a task

o   If the user decides not to save the changes made to a task, they can simply click the "**Cancel**" button. This action will exit the user from the task screen, and any unsaved content will be discarded.

o   However, if the user wants to save the changes, they can click the "**Save**" button. This will exit the user from the task screen, and the changes will be saved.

Creating a new note

- The user can press the **+** button in the "***My notes***" section to add a new note.

- Users can enter a note's title and its content using the **text inputs** in the Note activity.

Saving or canceling edits to a note

o If the user decides not to save changes made to a note, they can simply click the "**Cancel**" button. This action will exit the user from the note and any unsaved content will be discarded.

o However, if the user wants to save the changes, they can click the "**Save**" button. This will exit the user from the note screen, and the changes will be saved.
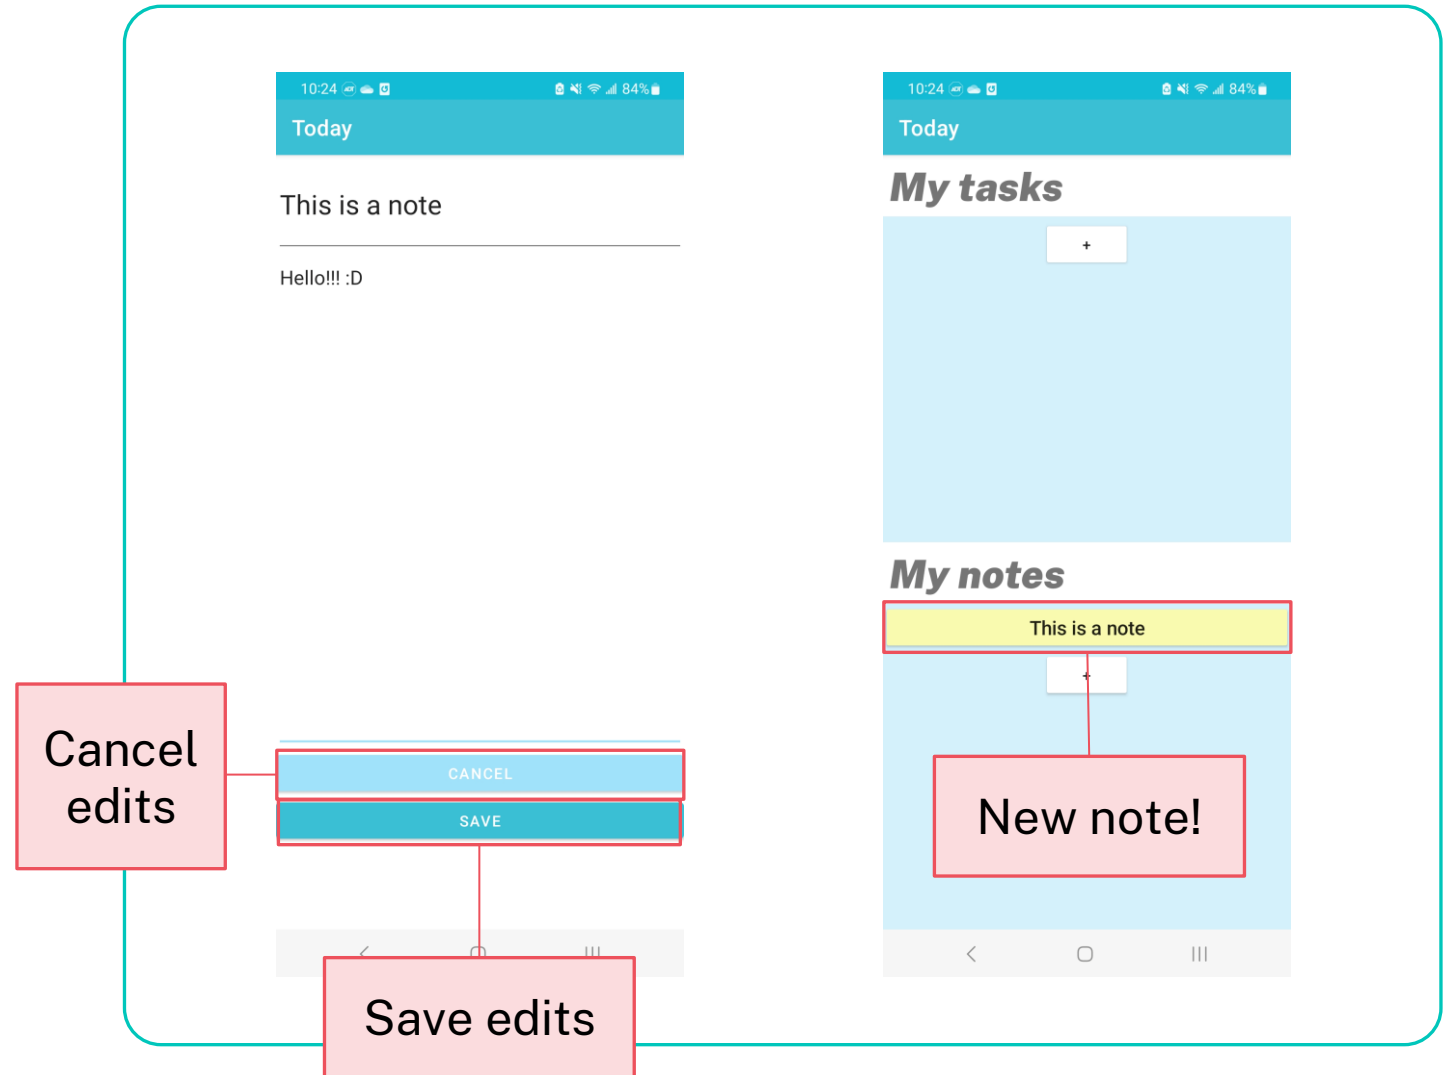

Deleting a note or a task

o To delete a task or a note, the user can simply **press and hold on the item they want to remove** from the main screen.

   o This action will prompt a dialog box asking the user if they want to proceed with the deletion. By confirming it, the item will be permanently removed from the app.
